

CYBER BRIEF

JANUARY 2023

“ Every year, EC-Council strives to support deserving learners through scholarships, and this time, we have taken it a step further by launching a 100% full scholarship program for India's market, in partnership with Bollywood actor Sonu Sood. This scholarship is exclusively for our C|CT program, which is an entry-level certification for career starters that focuses not only on theoretical but also practical aspects.

Cybersecurity is not just a matter of having the latest technology but also educating and empowering employees to make smart and safe decisions when using technology. By investing in cybersecurity awareness and training, organizations and individuals can strengthen their defenses against potential threats. Together with the Sood Charity Foundation, EC-Council looks forward to creating a secure digital community in India and leaving global imprints with our initiatives. ”

- **Jay Bavisi, President and CEO of EC-Council Group**

Cybersecurity is not a one-time cost but a continuous investment. As new technologies emerge and cyber threats evolve, organizations must remain vigilant and adapt their defenses accordingly. By investing in cybersecurity, organizations can stay ahead of the curve and protect their assets in the long run.

Investing in cybersecurity awareness and infrastructure is essential for organizations. Given our increasing reliance on technology in our personal and professional lives, it is more important than ever to protect ourselves against cyberthreats. Individuals and organizations must stay informed about the latest threats and take steps to protect themselves, such as by implementing strong passwords, regularly updating software and systems, and being vigilant against phishing scams and other social engineering.

By investing in cybersecurity, organizations can protect their sensitive information, prevent financial losses, maintain their reputations, and ensure their continued success in the digital age.

EC-Council's January 2023 Cyber Brief offers the latest cybersecurity trends, engaging webinars, video testimonials, security tips, and exclusive stories from our alumni to help you better understand cyber threats. We hope you will find these resources valuable and share them with your network. Learn the latest industry trends and do your part to create a secure online space.
